BEUCHAT 

TO ENJOY AND PROTECT THE SEA

TO ENJOY AND PROTECT THE SEA

In 1953, Georges Beuchat stamped his brand on the underwater world with an innovation that proved to be a turning point for modern diving. When the first isothermal wetsuit appeared on the market, diving changed forever. Sports divers and spear-fishers, properly protected for the first time, could now live out their passion without restraint, in direct touch with their sensations. Since that founding date, at Beuchat we have never stopped innovating.

Our aim has always been to imagine, develop and design diving apparel that would enable as many people as possible to enjoy our shared enthusiasm for the sea under the best possible conditions.

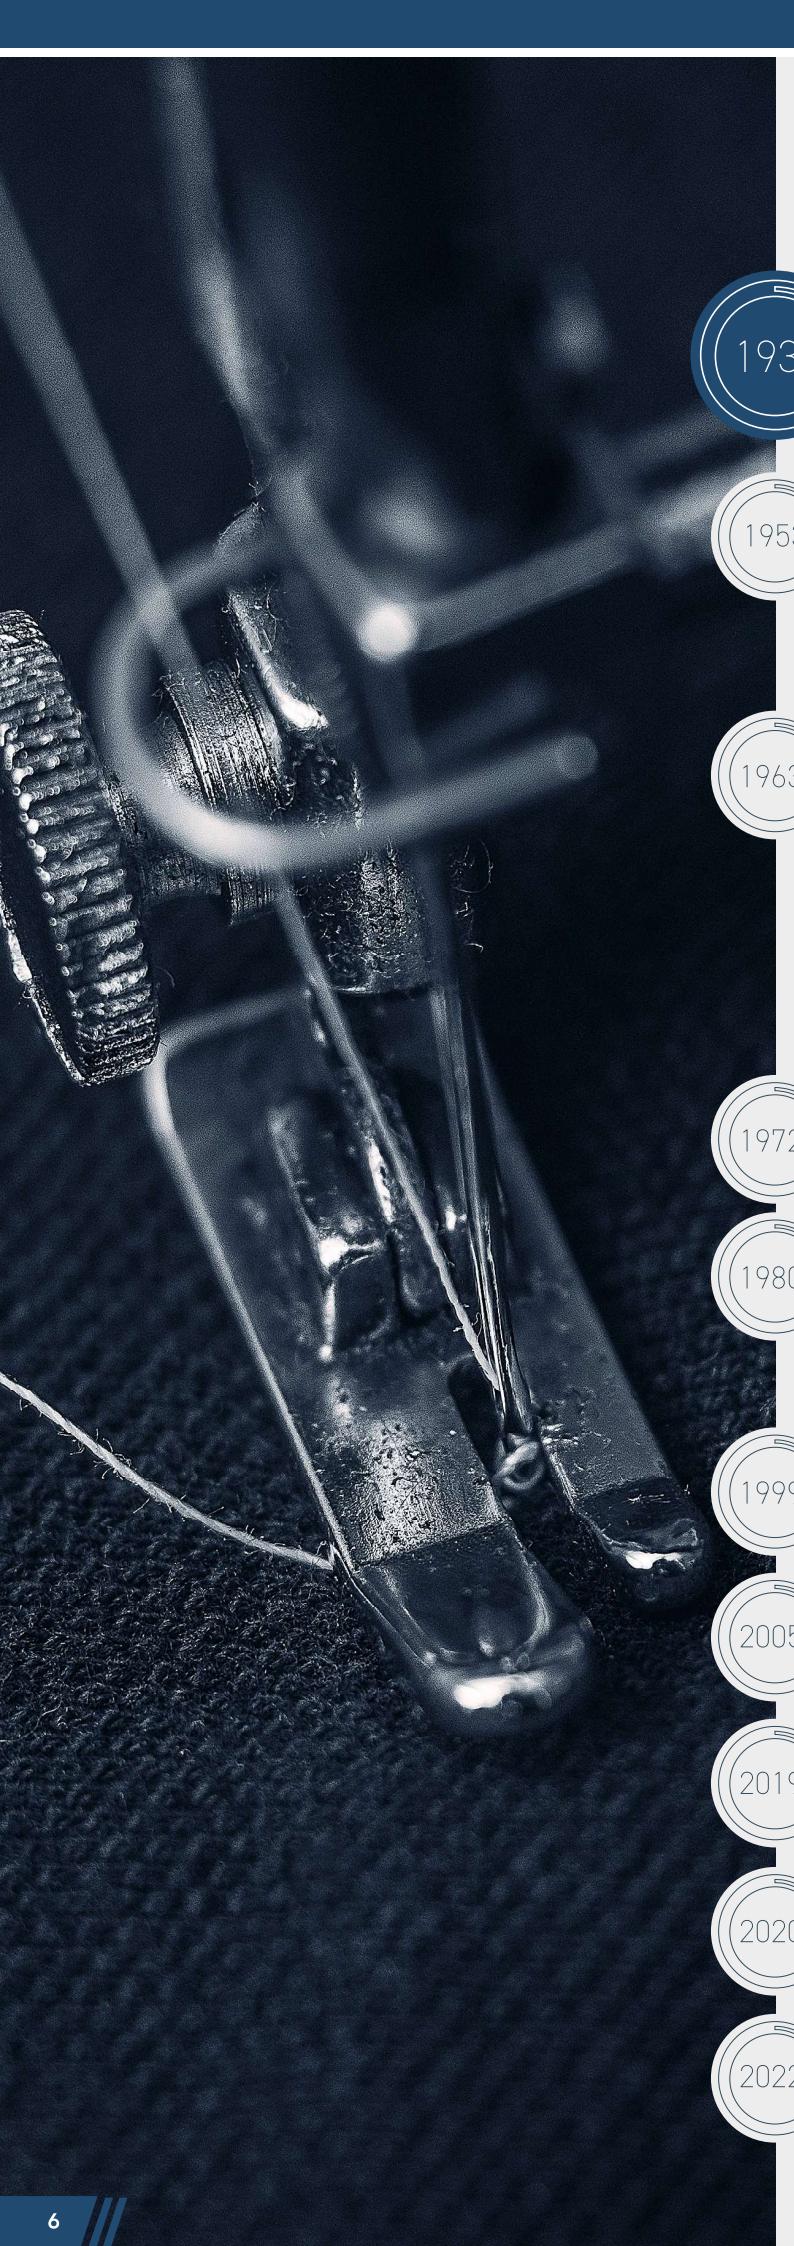

Christophe MARGNAT
BEUCHAT CEO

A handwritten signature in blue ink, appearing to read "Christophe Margnat".

— BRAND VALUES

PASSION //

The same passion inspired Georges Beuchat when he created the brand that motivates the women and men of Beuchat today and every day. The passion for the sea, and for sports, the passion to imagine and create the gear that enable each of us to get the most out of our favourite aquatic sports, whether underwater diving, free diving, snorkeling or spearfishing.

INNOVATION //

This value, central to Beuchat's DNA, has since been materialised by an approach of global innovation in the development of new product ranges, internal processes, work organisation and the services we offer to our customers.

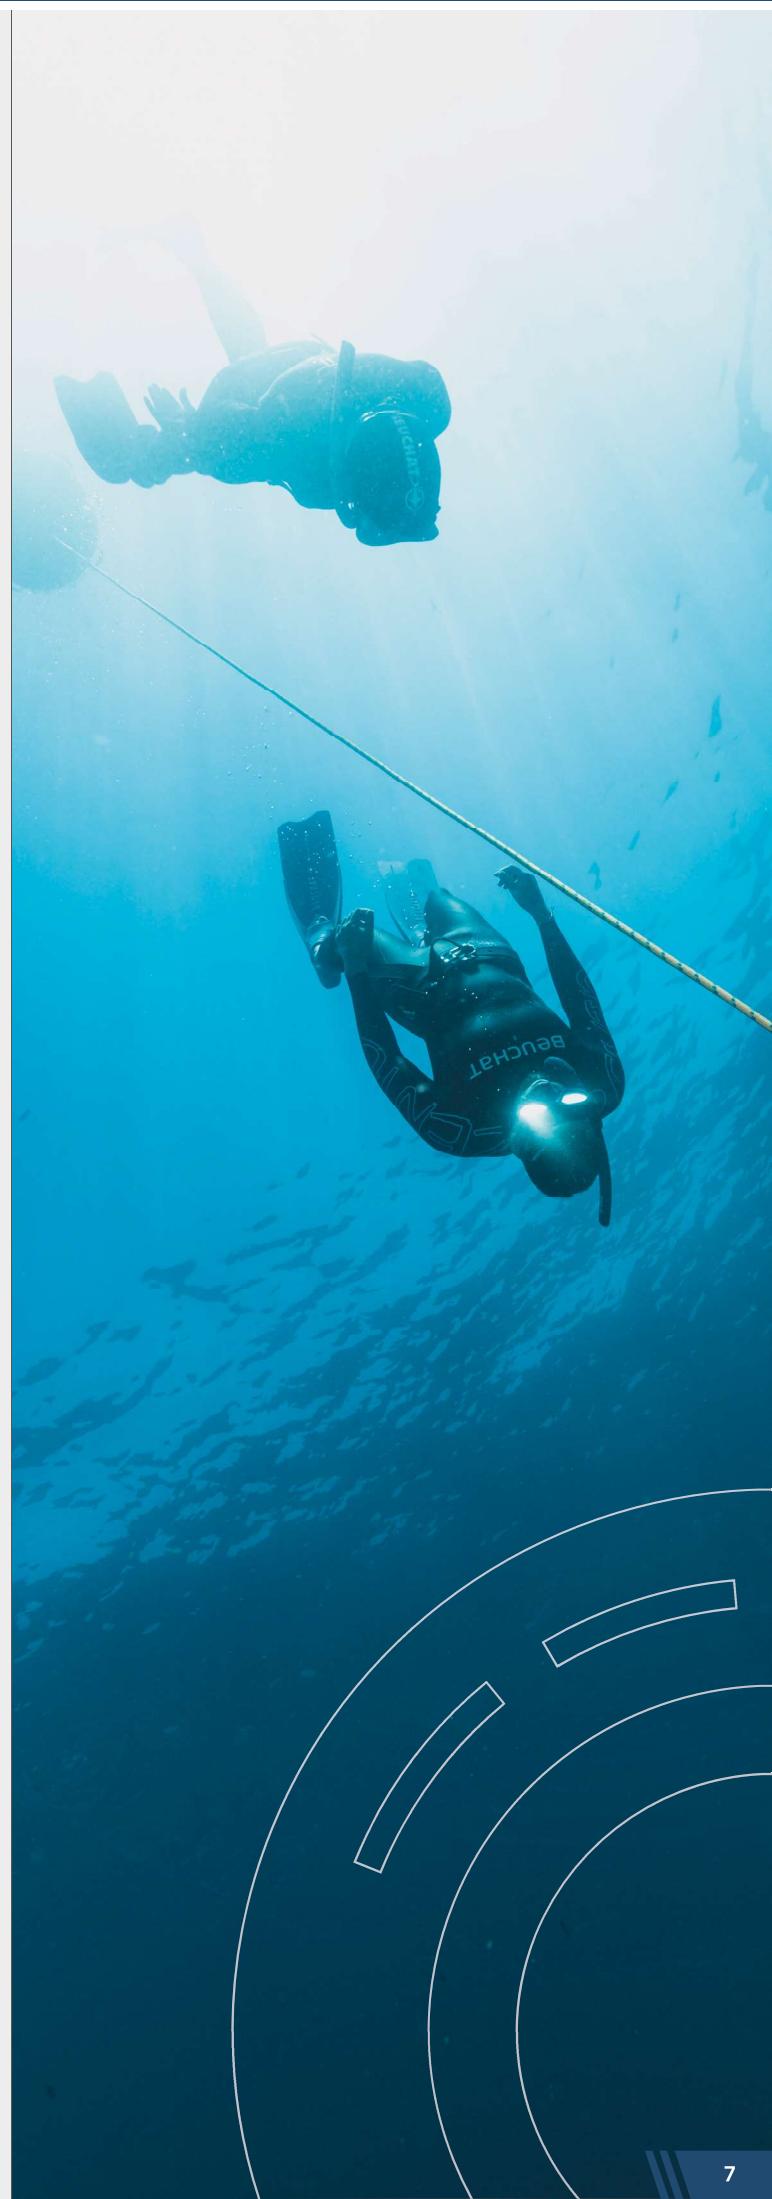

QUALITY //

As specialists in marine and underwater equipment, we are fully aware of the importance of the quality of our products in a potentially hostile universe. That's why we go to extraordinary lengths to ensure our equipment is efficient, tough and reliable.

We not only take special care at the design stage and ensure production quality in our own Marseilles plant; we also apply rigorous selection criteria for our outsourcers, aiming to develop long-term partnerships to ensure we all work together in the continual improvement of quality. In all cases, we control the quality of all our equipment before any articles go to market.

OUR COMMITMENT //

Our passion, our brand and our products are inspired by the marvellous but fragile universe that is the sea... (page 9).

BEUCHAT

-TO ENJOY AND PROTECT THE SEA

OUR COMMITMENT //

Our passion, our brand and our products are inspired by the marvellous but fragile universe that is the sea. However, the underwater world is not just a theatre where we can pursue our dreams. The sea plays a fundamental role in the balance of our eco-systems, so it was natural that Beuchat would always regard a commitment to eco-responsibility, in the conservation and protection of our oceY.O., as self-evident.

This approach is materialised by the measures taken within our company and through our support for specialised outside stakeholders who adhere to our own environmental standards.

ECO-FRIENDLY NEOPRENE //

Our strong commitment is reflected in the choice of materials used for our WETSUITS. We use neoprene made from a natural element, limestone, and not from petrochemicals such as standard neoprene.

Within such eco-friendly approach we also minimise the use of chemicals during manufacturing and make sure that as much neoprene loss as possible is recycled.

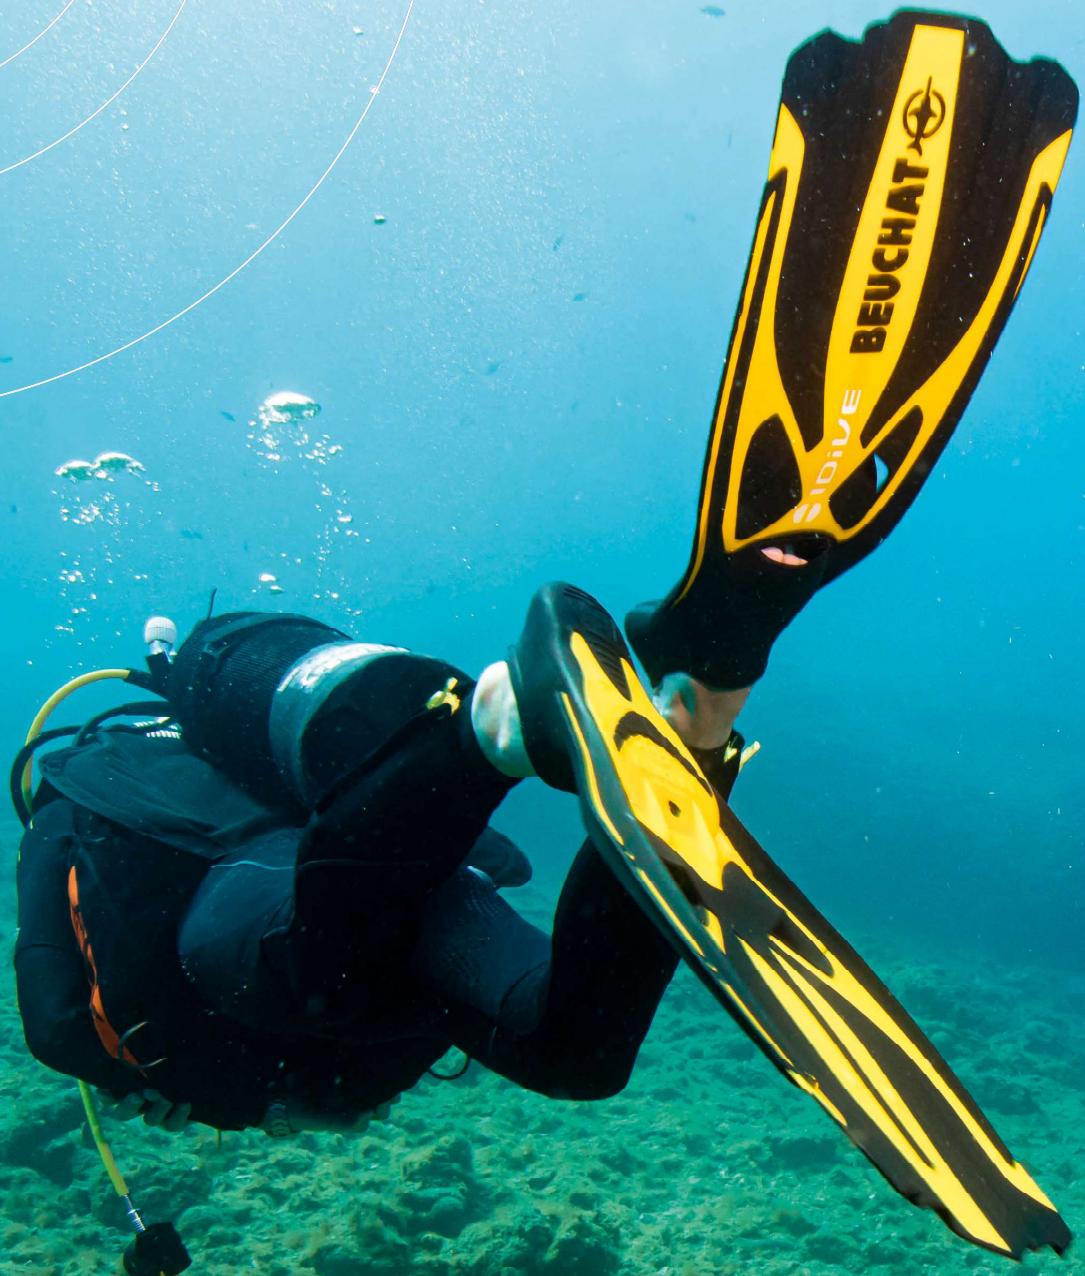

THE SEA AT THE HEART OF BEUCHAT

CYRILLE TORRES
CHIEF MARKETING OFFICER

The sea is at the heart of Beuchat, our founder's passion shared by our teams and users of our products and naturally Beuchat is committed to protecting it.

BEUCHAT®

DIVING

— WETSUITS

— BRAND VALUES

BEUCHAT QUALITY //

The sea, and in particular the underwater world, is a tremendously demanding environment for both humY.O. and equipment. As specialists, we are fully aware of the importance of the quality of our equipment. High quality is the most important guarantee of performance, endurance and reliability in a hostile universe. That's why we take the necessary measures at every stage of the design and manufacturing process to ensure our products offer the highest possible quality levels. Though the quality of our products is essential, quality of service is just as vital and we are dedicated to maintaining the best possible relations with our customers and all those who use our products.

DESIGNED IN FRANCE //

All our patterns are styled in our design office in Marseilles by our team of designers and pattern-cutters. French expertise in this area is acknowledged all around the world. Our exclusive patterns play a vital role in the comfort and performance of our suits, and thus make an important contribution to their quality.

CLOSE ATTENTION TO FINISHING //

Assembly is one of Beuchat's great strengths. Day after day, our R&D teams work on improving our methodology, constantly seeking to devise assemblies that are more efficient and more comfortable for the user. We take the greatest care in finishing our suits. Our finishes reflect the high quality of our manufacturing processes and play an essential role in the thermal protection, comfort and durability of our apparel.

ELASKIN X //

Beuchat Elaskin X neoprene is the result of Beuchat's rich experience as the originator of the underwater wetsuit more than 60 years ago. Elaskin X combines high performance, smart buoyancy, great softness and excellent thermal protection.

INNOVATING FOR USERS

STEFANO MORETTO
CHIEF OPERATING OFFICER

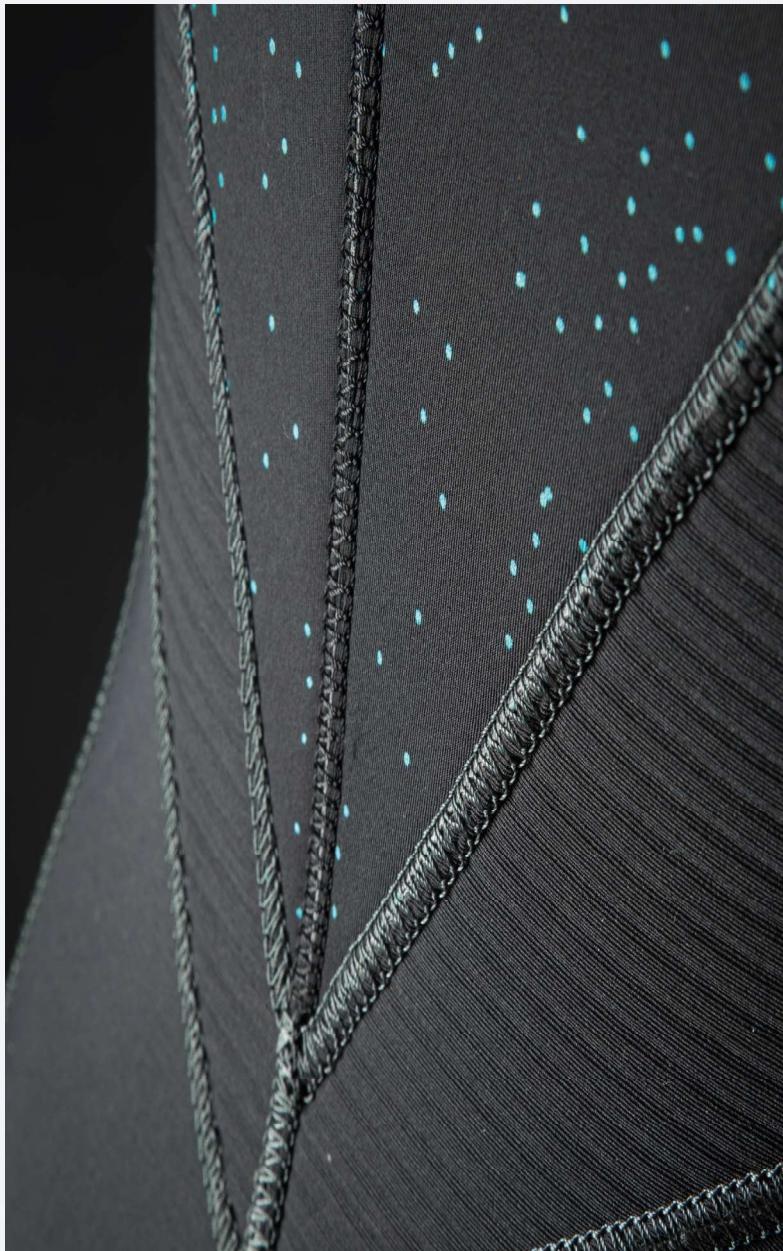

Innovating for the comfort of our customers and deliver a stronger experience. This is the challenge that animates our R&D team on a daily basis. This is the best way to continue the momentum given by Georges Beuchat.

TECHNOLOGIES AND INNOVATION

INNOVATE AT BEUCHAT

Innovation is a founding value of the Beuchat brand. Its creator, Georges Beuchat, was a tireless inventor who made his eponymous brand into a pioneer of underwater activities with two major innovations: the underwater speargun in 1947 and more importantly the isothermal wetsuit in 1953. This second invention represents a true revolution which allowed for huge growth in all of the underwater activities and lay the basis that have made Beuchat the current benchmark reference in thermal protection.

Innovation for Beuchat is a second nature with a main goal, the best user brand experience. It's done by an increased comfort, performance and resistance.

**NÉOPRÈNE ECO-FRIENDLY**

Made from limestone and recycled rubber. Also, the manufacturing process is designed to produce a smaller carbon footprint, reducing CO₂ emissions per suit by fully 24%.

**RECYCLED POLYESTER MATERIAL**

Knitted fabric using polyester thread manufactured from recycled plastic bottles. This process reduces consumption of both water and material. It takes just 45 recycled plastic bottles to produce enough material for a suit!

**FIRESKIN**

Fireskin is a warming material inside of the wetsuit. It provides a high-level thermal protection and keeps the body temperature steady. Its unique meshing structure and hydrophobic qualities are the roots of this outstanding technology.

**ELASKIN X**

Beuchat Elaskin X neoprene is the result of Beuchat's rich experience as the originator of the underwater wetsuit more than 60 years ago. Elaskin X combines high performance, smart buoyancy, great softness and excellent thermal protection.

**FLEX SYSTEM 2**

Preform with special wide embossing around articulations for greater freedom of movement (inside the elbows and behind the knees). The Flex System of the Beuchat technology turns your clothes into a true natural sheath.

**FREE FLEX ZONE**

This specific area of the wetsuit is more elastic and allows for more freedom of movement where the body and the arms are linked. Draft and exhaustion are significantly reduced.

**WDS (WATER DAM SYSTEM)**

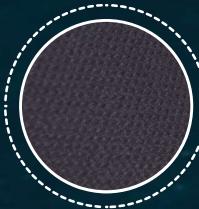

The Water Dam System is composed of fine embossing technology to stop the ingress of water that makes Beuchat suits more watertight than ever.

**PRE-FORMING**

It gives an anatomical and morphological shape to our clothes, so they are closer to the body in order to limit water pockets while increasing your level of ease.

**EASY WAVE SYSTEM**

The Easy Wave System technology guarantees a higher flexibility as well as an increased resistance to ripping.

**SUPRATEX 2**

Supratex is a very resistant and flexible material, perfect for reinforcement areas. Supratex 2 is 10% more flexible than Supratex and just as resistant.

**AES (AIR ESCAPE SYSTEM)**

A system of valves enables the air accumulated below the hood to be evacuated.

1 DIVE RANGE DIVING CENTER

NEWS FOR DIVING CENTERS

OUR RANGE //

The 1Dive range offers products that are designed especially for dive centres. Long-lasting articles with a distinctive look, intended for intensive use and offering multiple functional capabilities, developed in close consultation with dive centres.

DESIGNED FOR DIVING CENTERS

The 1Dive range proposes products specially designed for Dive Centres, long-lasting products devised for intensive use with the aim of simplifying the work of the centres.

FAST AND EASY IDENTIFICATION OF SIZE

Suit, fin and stabilizer jacket sizes are colour-coded for easy identification.

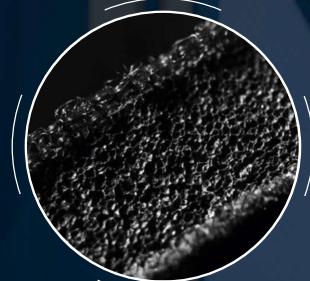

ADAPTABILITY SUITS RANGE

This new range comprises one piece or shorty suits in different thicknesses for different dive locations.

A RANGE OF TOUGH DURABLE PRODUCTS

Suit, fin and stabilizer jacket sizes are colour-coded for easy identification.

WORLD DIVING CENTERS

EACH SIZE HAS ITS COLOR!

COLOUR-CODED

Sizes can be identified easily by colour-coded markings to save time during dive prepping.

BEUCHAT®

SPEARFISHING

TECHNOLOGIES —AND INNOVATIONS

INNOVATE AT BEUCHAT

Innovation is a founding value of the Beuchat brand. Its creator, Georges Beuchat, was a tireless inventor who made his eponymous brand into a pioneer of underwater activities with two major innovations: the underwater speargun in 1947 and more importantly the isothermal wetsuit in 1953. This second invention represents a true revolution which allowed for huge growth in all of the underwater activities and lay the basis that have made Beuchat the current benchmark reference in thermal protection.

Innovation for Beuchat is a second nature with a main goal, the best user brand experience. It's done by an increased comfort, performance and resistance.

**ECO-FRIENDLY NEOPRENE**

Made from limestone and recycled rubber. Also, the manufacturing process is designed to produce a smaller carbon footprint, reducing CO₂ emissions per suit by fully 24%.

**MADE OF RECYCLED POLYESTER**

Knitted fabric using polyester thread manufactured from recycled plastic bottles. This process reduces consumption of both water and material. It takes just 45 recycled plastic bottles to produce enough material for a suit!

**TRIGOCAMO WIDE**

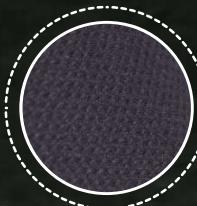

Unique 3D camouflage comprised of actual photographs assembled in 3D using trigonometric calculation software with a softened background effect, providing depth of field to enhance the effectiveness of the camouflage.

**ELASKIN X**

Beuchat Elaskin X neoprene is the result of Beuchat's rich experience as the originator of the underwater wetsuit more than 60 years ago. Elaskin X combines high performance, smart buoyancy, great softness and excellent thermal protection.

**PRE-FORMING**

It gives an anatomical and morphological shape to our clothes, so they are closer to the body in order to limit water pockets while increasing your level of ease.

**SUPRATEX 2**

Supratex is a very resistant and flexible material, perfect for reinforcement areas. Supratex 2 is 10% more flexible than Supratex and just as resistant.

**BRACA CONCEPT**

The Braca Concept is an exclusive Beuchat innovation that revolutionises spearfishing apparel by offering a simple, effective, hygienic and invisible solution to urinate. And of course, the Braca Concept is totally watertight!

**SPOT ZONE**

The SPOT marking provides added safety by making you more visible in your underwater environment to your partner, the boats and other users.

**PRECUT SYSTEM**

The PreCut System is an exclusive patent-protected Beuchat innovation that enables a long-john style bottom to be transformed into proper waistcut pant in complete safety. It allows the long john to be modified quickly and simply without affecting the efficiency of the garment and without requiring any other correction.

**MAGIC CAMO**

Selected natural color camouflage that only becomes visible in the water to conceal the presence of the spear fisher.

**ANTI-SQUEEZE SYSTEM**

The Anti-Squeeze System mitigates the suction effect in the ears and simplifies pressure equalisation during dives.

- TECHNOLOGIES AND INNOVATIONS

REVO CONCEPT

An exclusive Beuchat innovation implementing muzzle pulleys and power band rigging with under barrel recovery (patented Beuchat design). The system procures increased thrust along the entire length of the barrel for improved accuracy and increased power, resulting in significantly faster spear speeds. The system significantly reduces recoil at the moment of firing.

ANATOMICAL HANDLE

The anatomical Hero gun butt procures a grip that is ergonomic, safe, comfortable and efficient. The butt improves the spear-guns lateral manoeuvrability, accuracy of aim and efficiency, especially when shooting intuitively.

HERO HANDLE

Super comfortable anti-slip elastomer handle for optimum grip with or without gloves. Optimized inclination for natural arm-gun alignment.

INVERTED MECHANISM

Stainless steel mechanism with inverted position that brings improved load power. Mechanism with short trigger travel for improved accuracy.

MADE IN FRANCE

All our spearguns are made in France in our factory and workshops.

HERO 2 CARBON

BOARD - BUOY - HARNESS - SPEARFISHING

HAMMER BOARD	PLUMA BOARD	PHANTOM BUOY	LONG BUOY	HARNESS WITH QUICK RELEASE SYSTEM	HARNESS WITH QUICK RELEASE SYSTEM	
			Double bag	Black	Spot edition	
						
	1	1	1	1	1	
	Robst (Rigid dropstitch and bonded PVC. EVA pad and 2 handles for improved comfort during swimming. Towing ring, stainless steel rings, 2 elastic spearguns holders. Provided with: fin, international flag, inflator adapter, repair kit. 115x66x10 cm.	High resistance nylon envelope, 3 bladders. Red colour with safety flags. 8 rings for securing equipment, 3 towing and mooring rings. Elastic cords. Front compartment with fastener tab closure. Dim 65 x 82 cm.	Torpedo buoy that is highly visible topside for safety purposes but very unobtrusive underwater. Tough carry handle. Multiple fixing points, with one fastener designed to attach 2 spearguns. Delivered with Alpha and international flags.	The double celled version offers better resistance especially against rock abrasion. Flag holder (flag included).	One-handed quick-release system by opening a single buckle. Up to 8 kilos of ballast (2x2 kilos, 4x1 kilo). Very low buoyancy. Extra comfort. One size fits all. 840-denier PVC-coated canvas for high resistance.	One-handed quick-release system by opening a single buckle. Up to 8 kilos of ballast (2x2 kilos, 4x1 kilo). Very low buoyancy. Extra comfort. One size fits all. 840-denier PVC-coated canvas for high resistance. Spot Edition for greater visibility.

BEUCHAT 

A wide-angle photograph of a coastal scene. The upper portion shows a steep, rocky cliff face with patches of green vegetation at the top. Below the cliff is a body of water with a vibrant turquoise color. In the bottom left corner, there are abstract white line drawings that resemble stylized waves or ripples.
